PATIENT EXPERIENCE REVIEW · HSF-2026-0007 · NOVEMBER 09, 2026

Copyright HD Dental Studio -

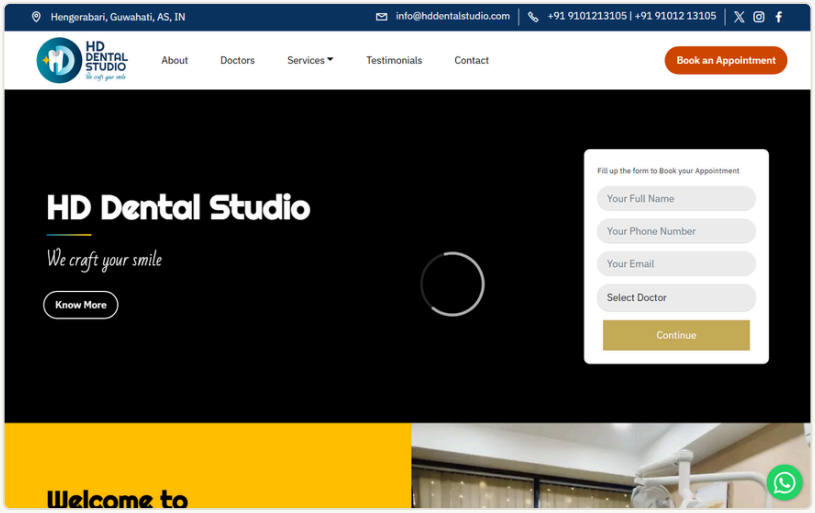

While HD Dental Studio has an established clinical reputation, the current website leaves prospective patients without several key decision-making tools on mobile and desktop.

4 of 6	58	4.6s	6	3
2026 STANDARD	MOBILE SCORE	LOAD TIME	KEY PAGES REVIEWED (VISUAL)	ISSUES FOUND

FROM YOUR SITE — MOBILE

FROM YOUR SITE — DESKTOP

HOW THIS WAS MEASURED — Visual review of the 6 pages that matter most to a patient's decision — Home · Booking · Testimonials · Contact · About · Doctors — captured at real phone and desktop sizes and reviewed on November 09, 2026.

Performance, Accessibility, Best Practices and SEO scores come from Google's own mobile performance test (Google Lighthouse / PageSpeed Insights).

The 2026 Standard is a fixed checklist of yes/no facts looked for in the pages we loaded. Alongside the 6-page visual review above, this checklist verified 8 pages where scheduling, galleries, reviews, and financing typically live.

WHERE FIRST-TIME PATIENTS HESITATE

FINDING 01 — Homepage - Mobile

Phone number is not a one-tap action button in the opening mobile screen

On a phone screen, a visitor cannot immediately tap a prominent call button in the opening section without scrolling or opening the navigation menu.

> WHY IT MATTERS FOR PATIENT CONFIDENCE — OUR ASSESSMENT
>
> Creates unnecessary friction for mobile visitors who want to call the front desk right away.

FINDING 02 — Homepage & Patient Info Pages

No clear treatment financing or membership options presented

Patients evaluating multi-tooth restorative or cosmetic care find no clear overview of payment plans, financing partners, or membership options on the main decision pages.

> WHY IT MATTERS FOR PATIENT CONFIDENCE — OUR ASSESSMENT
>
> Unclear financial pathways cause hesitation among fee-for-service patients considering larger treatment plans.

FINDING 03 — Homepage

Practice profile is not structured for Google search rich results

The site's pages lack complete structured dental practice profile data for search engines.

> WHY IT MATTERS FOR PATIENT CONFIDENCE — OUR ASSESSMENT
>
> Reduces visibility for local patients searching for specialized cosmetic and restorative procedures.

Patient can pick a time themselves	not verified	a “Book an Appointment” link leads to the Booking page, which we did not load
Tap-to-call button in the first mobile screen	✗	Phone links exist only in hidden parts of the page (e.g. a closed menu)
Before/after gallery	✓	“Smile Gallery” gallery available on the site
Patient reviews on the site	✓	“Our Testimonials” section on the homepage
Financing, membership or pricing information	not verified	could not be confirmed automatically — not counted
Mobile layout fits a phone screen cleanly	✓	The page fits a phone screen without sideways scrolling
Secure connection (HTTPS)	✓	Secure, encrypted browser connection
Practice profile structured for Google search	✗	No structured practice profile data for Google search found on 8 pages

Each line is a yes/no fact from the pages we loaded for this checklist, with where it was found. A ✗ means we checked (8 pages loaded for this checklist) and the item was not found or did not work. Items marked "not verified" could not be confirmed and are not counted.

Google Lighthouse, mobile — measured 2026-11-09: Performance 58 · Accessibility 84 · Best Practices 79 · SEO 88

THE VERDICT

On a phone this site scored 58/100 in Google's mobile performance test and took 4.6s to show its main content. Those figures are measured. Google rates anything over 4 seconds as slow; in its test your homepage took 4.6 seconds — more than that. What slow loading costs in visitors is an estimate: when a mobile page takes that long to appear, prospective patients often leave before the front desk ever knows they looked you up. Because we do not have your internal traffic data, we do not put a number on it. Across the key pages we reviewed, we also confirmed 3 presentation and booking issues that affect how a first-time visitor reads the site.

Before booking a high-trust cosmetic or restorative consultation — even after a personal referral — prospective patients privately judge the practice on their phone. When a site makes it effortless to see clinical proof and request a visit, it gives them one less reason to hesitate or compare another office. The core takeaway of this review is simple: your current website undersells the caliber of clinical care your practice delivers in the chair. Because your internal inquiry numbers are private, this is a directional assessment of patient first impressions, not a claim of measured traffic loss.

NEXT STEP — Prepared for Copyright HD Dental Studio -. If you would like to see how we resolve these friction points in a working custom preview tailored to your practice, simply reply to the note that accompanied this review. Everything is shared in writing — no sales call required.

This review is based on publicly visible pages and on Google's own performance data. We do not have access to your practice's private analytics, ad spend, or actual patient booking rates. Our observations reflect what a prospective patient sees on a modern mobile device, not an assessment of your clinical care.
