From here to launch

Everything below is what actually happens, in the order it happens. No stage of this is a surprise, and nothing is decided without you.

THE BUILD

DAY 0

You approve, we start

The advance arrives and the build begins on the start date in your agreement. You send us whatever materials you already have — we work with what exists and tell you plainly if something's missing.

DAYS 1–7

Structure and copy

We build the full page structure and write every line of copy around your actual services, credentials, and patients. You see it as it develops — not at the end.

DAYS 7–12

Design and build

The real site, on a real URL, working on a phone and on desktop. Not a picture of a website — the website.

DAYS 12–16

Your revisions

Two full rounds, included. This is where copy gets finalized — you read every word and change anything you want. Nothing goes live that you haven't read.

DAYS 16–21

Launch

We set up hosting on your own account, upload the site and handle the switch; we'll tell you which plan to choose. The domain stays yours. Your old site stays up until the moment the new one is ready.

Two to three weeks, typically. Often faster if your materials are ready and your revisions come back quickly. We'd rather give you the honest range than a number designed to sound impressive.

THE COST

$5,850	$1,500	$4,350
TOTAL	ADVANCE · RESERVES YOUR START	ONLY AFTER YOU APPROVE THE FINISHED SITE

The most you can ever pay before seeing your finished site is $1,500. If you change your mind within 7 days of paying, before work begins, it is refunded in full. The remaining $4,350 is due only after you approve the finished site on a private preview, before we switch your domain.

That's the whole number — no hourly billing, no change-order fees, and no charge for the two revision rounds. The launch date is written into your agreement. If launch is more than two weeks late because of us, your final payment is reduced by $100 for every further full week, up to $300.

What's included

Early Reservation Bonus IF AGREED BY TUESDAY, OCTOBER 13, 2026 (7 DAYS)

60 days of free minor post-launch edits (text, photos, and office hours — up to 5 requests per week with a 2-business-day turnaround). Typically billed by agencies as a monthly maintenance plan ($100–$300/mo) or by the hour at $150/hr.

Your whole site, in one new design

A complete redesign of your entire clinic website in one unified new design for a flat $5,850 — covering all real clinical and service pages of your practice (92 clinical and practice pages on your current site) plus up to 100 blog posts. If your old site has dozens of outdated city SEO clones or empty archives that slow down mobile loading, the full written list of pages is agreed before payment: we rebuild every page your clinic needs and set up permanent 301 redirects from old unneeded URLs so your Google rankings are 100% preserved.

Built for phones first

Most of your patients arrive on a phone. That's where we design first and test hardest.

Speed and accessibility

Built to target 90+ on Google PageSpeed and WCAG 2.1 AA. We test both before launch and share the results with you. This also helps older patients.

Two revision rounds

Included in the price, not billed separately.

How payment works. You can pay by direct USD bank wire (SWIFT) or through the licensed US escrow service Escrow.com (we cover the Escrow.com fee in full). Every payment is accompanied by an official 2026 commercial invoice for your CPA's year-end tax write-off. On Day 7 after start, we conduct a mutual direction check; if the creative direction is not accepted, work ends cleanly with no further liability. Everything is in a written agreement you review before you pay anything.

WHAT WE NEED FROM YOU

Short list. If you don't have something, say so — we work with what exists.

Domain access

So we can point the new site to your existing address at launch. If you're not sure who holds it, we'll help you find out.

Photos IF YOU HAVE THEM

The specific photos you want to see on the new site. If you don't send specific ones, we will simply use all the photos from your current website. During the Stage 2 revision round, you can provide any new photos you want to add, change, or remove, and tell us exactly where they should go.

Video OPTIONAL

If you have anything — a tour, a patient story, a procedure explainer — send it. If not, nothing changes.

Your logo IF YOU HAVE A VECTOR FILE

A .svg, .ai, or .eps if one exists. A high-resolution PNG works too.

Anything you want said

A service you want featured, a distinction you're proud of, something patients always ask about. If it matters to you, it goes on the site.

ABOUT THE WORDS

Three ways to handle the copy. You pick — and you can change your mind during the revision rounds.

> **Keep what you have**
> We use the text from your current site, cleaned up and reorganized. Fastest, and nothing about your practice changes.

> **Rewrite it entirely**
> We write everything fresh, based on your services and what your patients actually say. You approve every line before launch.

> **A mix**
> Most practices land here. Keep the parts you like, rewrite the rest. We'll tell you which sections we'd change and why.

You read everything before it goes live. Copy is finalized in the revision rounds — nothing is published that you haven't approved, and changing your mind at that stage costs nothing.

Everything in writing

We work asynchronously by design. Every request, every revision, every decision is written down — so nothing gets misremembered and you have a record of everything agreed.

Write whenever it suits you: between patients, at the end of the day, at midnight. You'll have a reply by the next morning your time, including weekends.

If you'd rather talk, our coordinator will call you at a time that suits you.

One point of contact

You deal with the person building your site. Nothing is passed between account managers, and nothing gets lost in a handoff.

Ready to start

Once your advance arrives, we begin the same day — no separate kickoff meeting needed.

Questions before you decide? Ask them. All of them. We'd rather answer twenty questions now than have you wondering after you've paid.
