**10 Core Pages**
ACTIVE CLINICAL STRUCTURE

**2 Live Concepts**
SIGNATURE & WARM REBUILDS

## 1. Opening Mobile Screen & First-Impression Clarity

Mobile opening screen requires multiple scrolls before patients reach clear treatment pathways and tap-to-call actions. Heavy unoptimized media and scripts slow down initial loading on mobile cellular connections (over 8+ seconds vs. Google's 2.5s benchmark), while key call and booking actions compete with layout clutter above the fold.

## 2. Clinical Reputation vs. Visual Presentation

Westlake Smile Studio: Mimi Theerathada, DMD holds an outstanding 5-star reputation on Google, yet prospective cosmetic and restorative patients visiting on mobile devices do not immediately see verified patient stories paired with direct consultation scheduling in the opening screen.

## 3. Site Architecture & URL Preservation

We identified 10 core clinical pages (plus 0 blog articles and 2 legacy utility URLs). Both new homepage concepts preserve 100% of your existing Google-indexed URLs while unifying desktop and mobile navigation.
